BASIC DESCRIPTION

25X1D

The Hsitsun Naval Facility (Figures 1 and 2) has been constructed since [REDACTED] and was first identified on photography of [REDACTED]. This brief, prepared as a second phase effort by NPIC, is intended to serve as an interim study.

The installation is located on the southern bank of the Liusha River, near its entrance to the Gulf of Tonkin, and is the only naval installation on the west side of the Leichou Peninsula. The installation consists of an operations area, a maintenance area, and a probable barracks area. The operations area contains one administration building, five support buildings, one pier, and an offshore wharf. The maintenance area consists of a graving dock and three support buildings. Four barracks/support buildings are between the two areas. A probable barracks area, 0.5 nautical miles south of the main installation, contains ten buildings.
